## **lighttexture, est. 2008**

lighttexture is a design collaborative between an architect, a lighting designer and a ceramic artist, creating unique designer lamps. Together the three designers have been collaborating to create a robust collection of fixtures that are both playful and sensual. Each of the partner designers brings in a different set of skills and sensibilities to the stage, which makes the lights a conversation through work.

### **Yael Erel, RA**

Yael Erel is an architect, educator and light artist. Erel is a licensed architect in New York and registered architect in Israel. Graduated with honors from The Cooper Union (BArch) and Rensselaer Polytechnic Institute (MArch). Her research on drawing with light projections operates on multiple scales - from objects to spatial installation and Urban environments. For over a decade Erel has been deeply immersed in architectural education, teaching architecture at the Harvard GSD, The Cooper Union, Columbia University, Pratt Institute and Rensselaer Polytechnic Institute.

### **Avner Ben Natan**

Avner Ben Natan has been working with light as material since the early 90's in his work as a lighting designer in films and television. After he moved to New York, he began to extend the work with light into the design of light fixtures and environments for art and dance installations, residential and commercial projects. A versatile artist, Ben Natan has also been writing poetry and prose. Received a BA in Sociology and Anthropology from Tel Aviv University.

### **Sharan Elran**

Sharan's research is process driven. He's interested in how technology stimulates the development of new forms and discourses. Using his background in physics and software engineering, he explores simple mathematical formulae that generate complex systems. As a part of lighttexture Sharan uses light as material and ceramics as an editing tool for light. Sharan received his MFA from Carnbrook Academy of Art and holds a B.Sc. in physics and computer science.

Claylight Tree Floor Lamp

## Claylight™ Series

The Claylight™ Lamp Series is a family of light fixtures designed and constructed with ceramic artist Sharan Elran. Made of Clay, Porcelain and metal they explore the link between ceramics and light. Using different types of perforations and material thickness, they create different light environments and patterns.

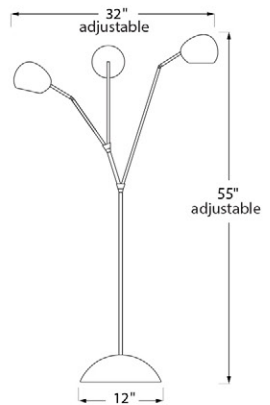

### Claylight™ Tree Floor Lamp

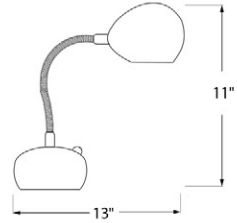

Claylight Tree Floor Lamp  
55"H x 23"W x 32"D  
3 x 35W dimmable Xenon Bulbs  
White ceramic and brushed nickel finish

SKU - CL-FLX3-D

## Claylight™ Desk Lamp

Claylight Porcupine Desk Lamp

11"H x 5"W x 13"D

35W dimmable Xenon Bulb

White ceramic finish - available in dot or line perforation pattern

SKU - CL-PD-D

Claylight Porcupine Desk Lamp

## Material Options - Claylight Series:

Porcelain (white when unlit)

Dot perforation - White ceramic

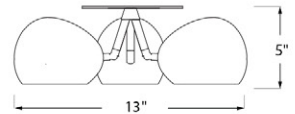

Line perforation - White ceramic

Solid white ceramic

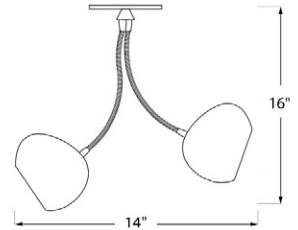

## Claylight™ Ceiling Lights

Claylight Clover  
13"H x 13"W x 5"D

SKU - CL-CLOV-L

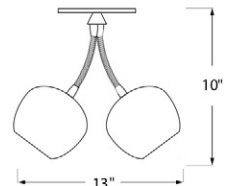

3 x 60W incandescent bulbs or three 7.5W dimmable LED bulbs  
White ceramic - Line perforation pattern

Double Headed Claylight  
16"H x 5"W x 14"D

SKU - CL-ADH-L

2 x 35W dimmable Xenon bulbs  
White ceramic - Line perforation pattern

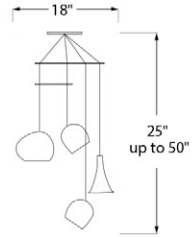

Claylight Double Spot  
10"H x 5"W x 13"D

SKU - CL-DSP

2 x 7W dimmable LED MR16 bulbs  
Solid white ceramic - available in black or terra cotta

## Claylight™ Chandeliers - Boomerang

Claylight Boomerang Miro

25"-50"H x 12"W x 18"D, up to 48" cords\*

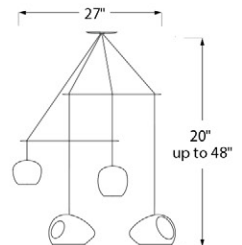

4 x dimmable 35W Xenon bulbs

Black ceramic; white ceramic shade with dot perforation pattern and translucent porcelain

SKU - CL-BMX4-D

Claylight Boomerang Miro

Claylight Boomerang Large

20" - 48"H x 10"W x 27"D, up to 48" cords\*

4 x 6W dimmable LED bulbs, or 4 x 35W dimmable xenon bulbs

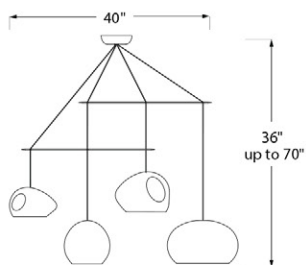

White ceramic - image above showing dot and line perforation pattern\*

SKU - CL-BM-LARGE

\* Available with longer cords upon request.

Claylight Boomerang XL

Claylight Boomerang XL

36"-70"H x 11"W x 40"D with up to 72" cords \*

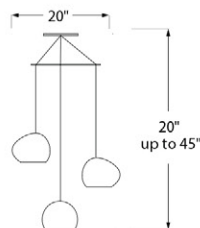

4 x 53W dimmable incandescent bulbs or 4 x 8W dimmable LED bulb

White ceramic - line and dot perforation pattern

SKU - CL-BMXL

SKU - CL-BMX3-L

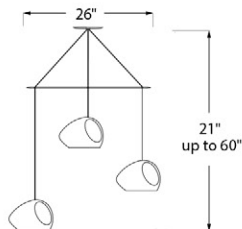

Claylight Boomerang x 3

20"-45"H x 9"W x 20"D with up to 48" cords \*

3 x dimmable 35W Xenon bulbs

White ceramic - line perforation pattern

Claylight Boomerang Double Cut

21"- 60"H x 13"W x 26"D with up to 60" cords\*

3 x 60W Incandescent bulbs, or 3x7.5W dimmable LED bulbs

White ceramic - dot perforation pattern

SKU - CL-BM-DC

Claylight Chandelier

### Claylight™ Chandeliers

Steamlight Desklamp

## Steamlight™ Series

The Steamlight™ Lamps series is a family of adjustable light fixtures constructed from a ready-made stainless Steel steamer, that is used as a device to direct and reflect light. Creating both a patterned light and an adjustable task light. The Lamp head operates as an iris, that allows for enlarging or reducing of the central light beam. This mechanism was patented (patent #8,025,430)

 SKU - SL-SCX-D

Iris Floor Lamp  
Iris Table Lamp

## Iris Series

### Finish Options

Brushed Brass

Brushed Stainless Steel

Composed of overlapping brass leaves that create an adjustable three dimensional aperture, the aperture comprises two opposing irises: as one opens, the other closes. The Iris line is a fruit of years of development of the patented overlapping leaves mechanism, First explored in lighttexture's Steamlight™ series (patent #8,025,430). Fabricated in stainless steel and brass, the reflective interior of the leaves casts intricate reflections that change as the aperture changes its configuration. Light reflects off the metal leaves and bathes the space in their color: steel projecting a silver hue and the brass casting a gold hue.

At lighttexture we treat light as a material that can create an atmosphere and open up new ways of experiencing space. We emphasize light quality and textures as much as we consider the sculptural qualities of the light fixture. We fabricate all of our products ourselves with utmost care and craftsmanship, using handmade techniques together with cutting edge digital technologies, creating lights that are adjustable, efficient and above all beautiful and inspiring.
